ABOUT ASSET POINT

Asset Point® is a global IT software and services company with more than 25 years of experience helping firms proactively manage change in their IT environments. The Asset Point software suite provides the most cost-effective and comprehensive solution for managing physical capacity in facilities, modeling IT changes and managing processes for IT optimizations from the data center to the desktop.

Premier Global Provider of Infrastructure Technology Solutions

Asset Point is part of Align's suite of solutions. Align is a global infrastructure technology (IT) solutions firm with key competencies in "technology optimization initiatives" – designing, deploying, moving and consolidating technologies and advanced network infrastructures. Since 1986, the world's leading firms have relied on Align to enable business and IT alignment, and to deliver solutions for business change and growth.
